About Us

We, Bhatia Auto Engineers, are a proud and strongly committed business entity which has been widely renowned by customers across the nation for its specialization in serving the most praiseworthy quality Auto Parts. The incorporation of our firm was done under the guidance of Mr. S. Nirmolak Singh, which is now operating under the shadow of Mr. S. Jagjit Singh & Mr. S. Tajinder Singh. These are those individuals who have not only made us excel in our works as a Manufacturer, but have also greatly aided us in becoming a company which simply perfects at every other work.

We believe in continuously changing ourselves and always welcome any opportunity which might slightly enhance our capabilities to cater to more customers. Center Bolt, Front & Rear Axle Flange, Front Brake Disc are some of the products, by catering which, we earn praise from our customers.

Infrastructure

Continuous change is necessary. This is what ascertains that a company remains capable to deliver the Front & Rear Axle Flange, Brake Disc, Chassis Hanger, etc., to the customers in this dynamic market where regularly improved products are required. The premises in which our offerings are developed is not only maintained over a large area but is also at par with all the standards of this industry. Each one of the unit is equipped with most advanced technology machine which leads us towards engineering our products in a precise and perfect manner. Spanned over a large area this premises of our firm carries in-house manufacturing, processing and testing departments. A highly sincere team of personnel is appointed by us, who maintains harmony in these wings and further helps us in achieving our objectives in a streamline manner.

Team

We are endeavoring with pride only because of the works done by our employees. It is the way in which our personnel handles each task, which further makes us a business entity worthy of praise in the eyes of the customers. We only recruit our employees on the basis of their expertise in their respective role due to which we are able to maintain proficiency in execution of the works. Further, in order to finesse their skills we provide them with training sessions so that we can work with more efficiency and effectiveness.
